

KASSTA Webinar

Korean-American AeroSpace Science and Technology Association

Wednesday, Sep 16th, 2026 (virtual)

4:00 PM (PT), 7:00 PM (ET)

[Register for the Webinar](#)

Speakers

Sung Joo Kang, 항성

Ph.D. in Astrophysics
Director, MORE SCIENCE Co., Ltd.
Science YouTuber & Creator of <안될과학>

Why Do We Talk About Space?

- When Technology Becomes a Story

Space exploration is a journey of overcoming physical limits: the rocket equation, atmospheric reentry, gravity assists. What is less obvious is that these same principles describe how science reaches people. Going farther means learning what to jettison, and surviving reentry means being blunt rather than sharp. Drawing on my path from astrophysics research and observations on Mauna Kea to science museums, broadcasting, digital content, and spaceflight commentary, this talk examines how aerospace science shaped the way I communicate science. Through Earthrise and the Pale Blue Dot, two images that were never part of the plan, we will ask how technological achievements become the stories that remain in our collective memory, and how scientists and engineers can connect their work with society in ways that are understood, remembered, and carried forward.

Impossible Science Institute, Republic of Korea

과학의 대중화를 위해 현직 과학자들이 직접 크리에이터로 참여한,
될과학 "안될과학" 다 만드는 본격 과학 채널

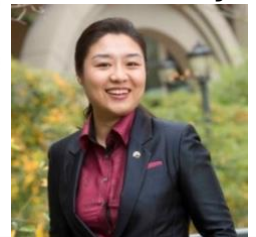

**It is planned to give gift cards to selected participants.
To be qualified, join KASSTA and choose KASSTA as your APS if you
are a KSEA member.**
